Schneider
Electric

EasyPact TVS: control & protection,

Leader in the motor starter market for more than 80 years, Schneider Electric has designed EasyPact TVS range to provide you with the competitive solutions you were expecting.

EasyPact TVS starters range is the perfect fit between quality, features and price.

A cost-effective offer

- > The best price for the performance and quality level you need.
- > A maximum of solutions with an optimal number of products.
- > Designed to perform the essential starter's functions: control and overload protection.

Simple and intuitive

- > Easy to install.
- > Covering 80 % of applications.
- > With the key accessories to easily build lots of Do-It-Yourself solutions.
- > With an intuitive commercial references system: easy to order, easy to understand and easy to remember.

Guaranteed availability

- > Available in distribution.
- > EasyPact TVS fully benefits from Schneider Electric world wide policies: in terms of standards of production, distribution, quality, availability, services and after-sales support.

in a simple way

EasyPact TVS offer

Power control & protection

Note:

■ means the relay can match with contactor both in electrical and mechanical.

□ means the relay can match with contactor only in electrical (can not directly mounting).

Presentation

EasyPact TVS thermal overload relays are designed to protect a.c. circuits and motors against:

- overloads
- phase failure
- Long starting time
- prolonged stalled rotor condition.

The thermal relay controls permanently the current driven by the motor. When this current exceeds the setting it's auxiliary contacts will change state, causing the motor to stop.

Description

LRE●●, LRE48●

- 1 Adjustment dial I_r.
- 2 Test button.
Operation of the Test button allows:
 - checking of control circuit wiring,
 - simulation of relay tripping (actuates both the N/O and N/C contacts).
- 3 Stop button. Actuates the N/C contact; does not affect the N/O contact.
- 4 Reset button.
- 5 Trip indicator.
- 6 Setting locked by sealing the cover.
- 7 Selector for manual or automatic reset.

LRE3●●

LRE relays are supplied with the selector in the manual position, protected by a cover. Deliberate action is required to move it to the automatic position.
